

JEHAN ZAIB ALTAF

SQA Automation Engineer

Dedicated QA professional with 5+ years of experience in manual and automated testing for web and mobile applications. Skilled in test planning, execution, and framework development, with expertise in agile environments. Proven track record of delivering high-quality results and collaborating with cross-functional teams to ensure thorough test coverage. Seeking to leverage strong problem-solving skills and a proactive approach to enhance testing efficiency and process improvement.

SKILLS

- Jira
- Trello
- Postman API Testing
- Selenium Web Automation
- Appium App Automation
- JMeter Performance Testing
- K6.io Load Testing
- SQL Database Testing
- Pytest Automation Framework
- Jenkins CI/CD
- GIT Version control

CERTIFICATIONS

- ISTQB Foundations level (CTFL)- 2023
- Master Python Web Scrapping & Automations using Selenium – 2023

WORK EXPERIENCE

Senior Automation Engineer
Walee Technology | 2021-Present

- Performed manual testing of Walee web and mobile apps, validating functionality, usability, and performance.
- Led manual testing for the Walee Financial Loan App (Hakeem), ensuring functional accuracy and system stability.
- Developed Selenium automation scripts with Python for Walee Enterprise, focusing on regression and integration testing.
- Automated test cases for the Influencer Marketing platform using Selenium with Python, boosting coverage and efficiency.
- Built automation frameworks with Appium and Java for Walee Android app, ensuring cross-platform validation.
- Created Selenium automation scripts with Python for the EMR project, validating critical workflows and reliability.
- Conducted API data validation using Selenium with Python, ensuring frontend-backend consistency.
- Developed Pytest frameworks for Ask Walee, enabling scalable and efficient test execution.
- Performed load and stress testing with K6.io, identifying performance bottlenecks and improving resilience.
- Executed database testing for Walee Enterprise, ensuring data integrity and backend validation.
- Conducted API testing with Postman, verifying API functionality and response accuracy.
- Automated test reporting with HTML, enhancing visibility into test results.
- Integrated automated tests with Jenkins for continuous integration.
- Managed version control with Git, ensuring collaboration and version tracking.
- Managed team tasks, overseeing test planning, execution, and reporting for efficient project delivery.

SQA Engineer
MTBC | 2018- 2020

- Worked on the Telehealth Project, conducting functional and regression testing to ensure system compliance with healthcare regulations.
- Tested the talkEHR App, focusing on validating key functionalities, user experience, and system stability across various healthcare workflows.
- Performed load testing, simulating high-traffic scenarios to identify performance bottlenecks and ensure system reliability under peak conditions.
- Developed automation scripts for Reflection software (Web Automation) using Selenium, improving test coverage, efficiency, and reducing manual testing efforts.

EDUCATION

Bachelor of Science in Software Engineering
International Islamic University, Islamabad | June-2018
